Confirmation of Candidature, School of Chemistry and Biochemistry

The designated tasks for all new PhD students within the first year of full-time enrolment are as follows:

1) Each student must present a seminar to the School in which the background to the proposed field of study is enunciated and the experimental aims and the methodologies to be employed are outlined and;

2) Each student must prepare and submit a Research Proposal to the Graduate Research School within the first year of candidature. This must then be approved by the Graduate research School within the first year of candidature.
